Module 1 – Lesson 6: How ET Contact is a Shift to a Higher Dimension

- The Shift to Fourth Density is the shift to the next level of our collective dream. As we ascend into Fourth Density consciousness reality becomes more dream like - we're entering a density of light and vibrational frequency where interdimensional beings exist. We're entering into *their* reality!
- The ETs currently interacting with our planet are mostly interdimensional in nature. This is how their ships are able to instantaneously teleport to any location. They've mastered their inter-dimensionality and are able to move in and out of time space and other dimensions. As we ascend into Fourth Density we too are becoming interdimensional and are now able to interact.
- Ascension into Fourth Density is the remembering we are Infinite Multidimensional Consciousness and the ETs are a part of our own being!
- Extraterrestrial contact is part of a greater expansion of our consciousness. As we ourselves become more telepathic, heart centred and service to All oriented our consciousness expands into higher dimensions of reality looking for new answers and perspectives. The ETs are a reflection of this, meeting us in a new dimension of reality that we're only just beginning to enter into and understand.
- As the ETs constantly remind me in my channeling sessions, they are us and we are them!
